SUMMARY

Motivated Software Engineer with hands-on experience developing **AI-powered, data-driven, and cloud-based applications**, skilled in **Python, C++, Java, JavaScript, and Azure ecosystem development**. Proven ability to design and deploy intelligent digital solutions through strong problem-solving, clean architecture, and user-centric engineering. **Microsoft Azure Fundamentals & Azure AI certified**, with experience in machine learning, generative AI, and scalable application design using modern development workflows and tools such as GitHub Copilot, CI/CD, Pandas, and NumPy. Passionate about innovation, continuous learning, and building technology that makes a meaningful impact.

EDUCATION

New Horizon College of Engineering — Sept 2023 - Mar 2027

Bachelor of Engineering in Computer Science - 9.08

Treamis World School — March 2021 - March 2023

PCMC - 81%

PROJECTS

- **MetaArena — Steam Game Insights & Forecasting**
  Built a full-stack data analytics platform that visualizes live Steam player statistics and generates 30-day forecasting using machine-learning based trend modeling, with interactive charts, real-time reviews sentiment, and game-to-game comparison features.
- **Platera: AI Recipe Generator**
  Developed a generative AI application that elevates the home dining experience by transforming leftover ingredients into unique recipes, complete with an AI-powered sommelier to suggest the perfect wine pairing.
- **AI Doppelganger**
  A simple text based doppelganger that stimulates personalized responses based on user-provided information about an individual.

SKILLS

- **Languages:** Java, Python, C, C++, JavaScript, HTML, CSS, Shell Script
- **Cloud & Data:** Microsoft Azure (Certified), MySQL, Big Data Concepts
- **Tools & Frameworks:** GitHub, Pandas, NumPy, Visual Studio Code, Figma, Jupyter Notebook
- **Methodologies:** Agile, CI/CD, Application Resiliency
- **AI & Generative AI:** GitHub Copilot, Prompt Engineering, machine learning, ChatGPT, Chain of Thought Prompting, Prompt Patterns
- **Blockchain & FinTech:** Web3, DeFi, Smart Contracts, Financial Technologies
- **Soft Skills:** Problem-Solving, Technical Writing, Team Collaboration, Research & Adaptability

CERTIFICATE

Microsoft Certified: Azure Fundamentals

- Gained expertise in Microsoft Azure cloud services, including core concepts, architecture, security, compliance, and pricing, with a focus on effective deployment and management.

Microsoft Certified : Azure AI Fundamentals

- Acquired foundational knowledge of AI concepts and services on Microsoft Azure, including machine learning, computer vision, natural language processing, and responsible AI principles, with a focus on real-world applications and solution implementation.

Hacker Rank Certified: Java

- Validated proficiency in Java programming, covering core concepts, OOP principles, problem-solving, and real-world coding challenges.

Certification in Python Programming

- Validating proficiency in Python programming, from fundamentals to advanced concepts, including efficient coding, data structures, algorithms, OOP, and real-world project implementation.

Certification in GitHub Copilot for java and Spring Boot

- Gained hands-on experience using GitHub Copilot to enhance Java and Spring Boot development with AI-assisted coding for real-world applications.

LANGUAGES

- **English** (advanced), **Spanish** (Intermediate), **Hindi** (Intermediate), **Odia** (Intermediate)
